§ 35.1300

§35.1300 Purpose and applicability.

The purpose of this subpart R is to provide standards and methods for evaluation and hazard reduction activities required in subparts B, C, D, and F through M of this part.

§ 35.1305 Definitions and other general requirements.

Definitions and other general requirements that apply to this subpart are found in subpart B of this part.

§35.1310 References.

Further guidance information regarding evaluation and hazard reduction activities described in this subpart is found in the following:

- (a) The HUD Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing (Guidelines);
- (b) The EPA Guidance on Residential Lead-Based Paint, Lead-Contaminated Dust, and Lead Contaminated Soil;
- (c) Guidance, methods or protocols issued by States and Indian tribes that have been authorized by EPA under 40 CFR 745.324 to administer and enforce lead-based paint programs.

§ 35.1315 Collection and laboratory analysis of samples.

All paint chip, dust, or soil samples shall be collected and analyzed in accordance with standards established either by a State or Indian tribe under a program authorized by EPA in accordance with 40 CFR part 745, subpart Q,

or by the EPA in accordance with 40 CFR 745.227, and as further provided in this subpart.

§35.1320 Lead-based paint inspections and risk assessments.

- (a) Lead-based paint inspections. Lead-based paint inspections shall be performed in accordance with methods and standards established either by a State or Indian tribe under a program authorized by EPA, or by EPA at 40 CFR 745.227(b), except that the definition of lead-based paint shall not include a loading (area concentration) or mass concentration greater than that in the definition at §35.110 of this part.
- (b) Risk assessments. (1) Risk assessments shall be performed in accordance with methods and standards established either by a State or Indian tribe under a program authorized by EPA, or by EPA at 40 CFR 745.227(d), and paragraph (b)(2) of this section.
- (2) Risk assessors shall use levels defining dust-lead hazards and soil-lead hazards that are no greater than those promulgated by EPA pursuant to section 403 of the Toxic Substances Control Act (15 U.S.C. 2683), or, if such levels are not in effect, the following for dust or soil:
- (i) *Dust.* A dust-lead hazard shall be a dust-lead level equal to or greater than the applicable loading (area concentration), based on wipe samples, in the following table:

INTERIM DUST LEAD STANDARDS

Evaluation method	Surface	Interior win- dow sills, µg/ ft ² (mg/m ²)	Window troughs, μg/ ft ² (mg/m ²)
	Floors, µg/ft ² (mg/m ²)		
Lead Hazard Screen Risk Assessment Reevaluation Clearance	25 (0.27) 40 (0.43) 40 (0.43) 40 (0.43)	250 (2.7) 250 (2.7)	Not Applicable. Not Applicable. Not Applicable. 800 (8.6).

Note: "Floors" includes carpeted and uncarpeted interior floors.

- (ii) Soil. (A) A soil-lead hazard for play areas frequented by children under 6 years of age shall be bare soil with lead equal to or exceeding 400 micrograms per gram.
- (B) For other areas, soil-lead hazards shall be bare soil that totals more than 9 square feet (0.8 square meters) per

property with lead equal to or exceeding 2,000 micrograms per gram.

(3) Lead hazard screens shall be performed in accordance with the methods and standards established either by a State or Indian tribe under a program authorized by EPA, or by EPA at 40 CFR 745.227(c), and paragraph (b)(2) of
